## Skills

- Data cleaning
- Web scrapping
- Data pre-processing and plotting
- Reading data using SQL.
- Interpersonal skills
- Ability to work in team or individually

## Languages

Arabic | Native

English | Fluent

## Objective

Trained data scientist, driven by results, skilled in python, data analysis, and natural language processing. Aiming to work in a collaborative firm, where I can employ my skills and build on them to solve problems and uncover insights.

## Training and Certificates

### National ICT Up-skilling program

**Al Hussein Technical University | June 2021 – Sept. 2021**

An intensive focusing on applied technical and employability skills, including:

- **Data science (180 Hours):**  
Hands-on with python and -GitHub.  
Supervised and unsupervised ML techniques.  
Natural language processing.  
Solved real-world problems.
- **English language (100 Hours):** Focusing on report and email writing.
- **Soft skills (60 Hours):** Life and work skills including positive attitude, effective communication and goals setting.

### Young Thinkers Program

**Al Ghurair Foundation | June 2021 – Sept. 2021**

A sum of 20 courses focused on time management, networking, communication, and life balancing.

## Education

### Bachelor's degree | Computer Engineering

**Al Balqa' Applied University | Sept. 2015- Jan. 2021**

## Projects

### Capstone project

**Al Hussein Technical University | Aug. 2021 – Sept. 2021**

Implementing machine learning algorithms to analyze data and find solution for a problem.

### Graduation project

**A Balqa' Applied University | Apr. 2020 – Aug. 2020**

Using both machine learning algorithms and NLP techniques to analyze and predict Covid-19 fake news.
